

Gestalt Principles in Everyday Interfaces

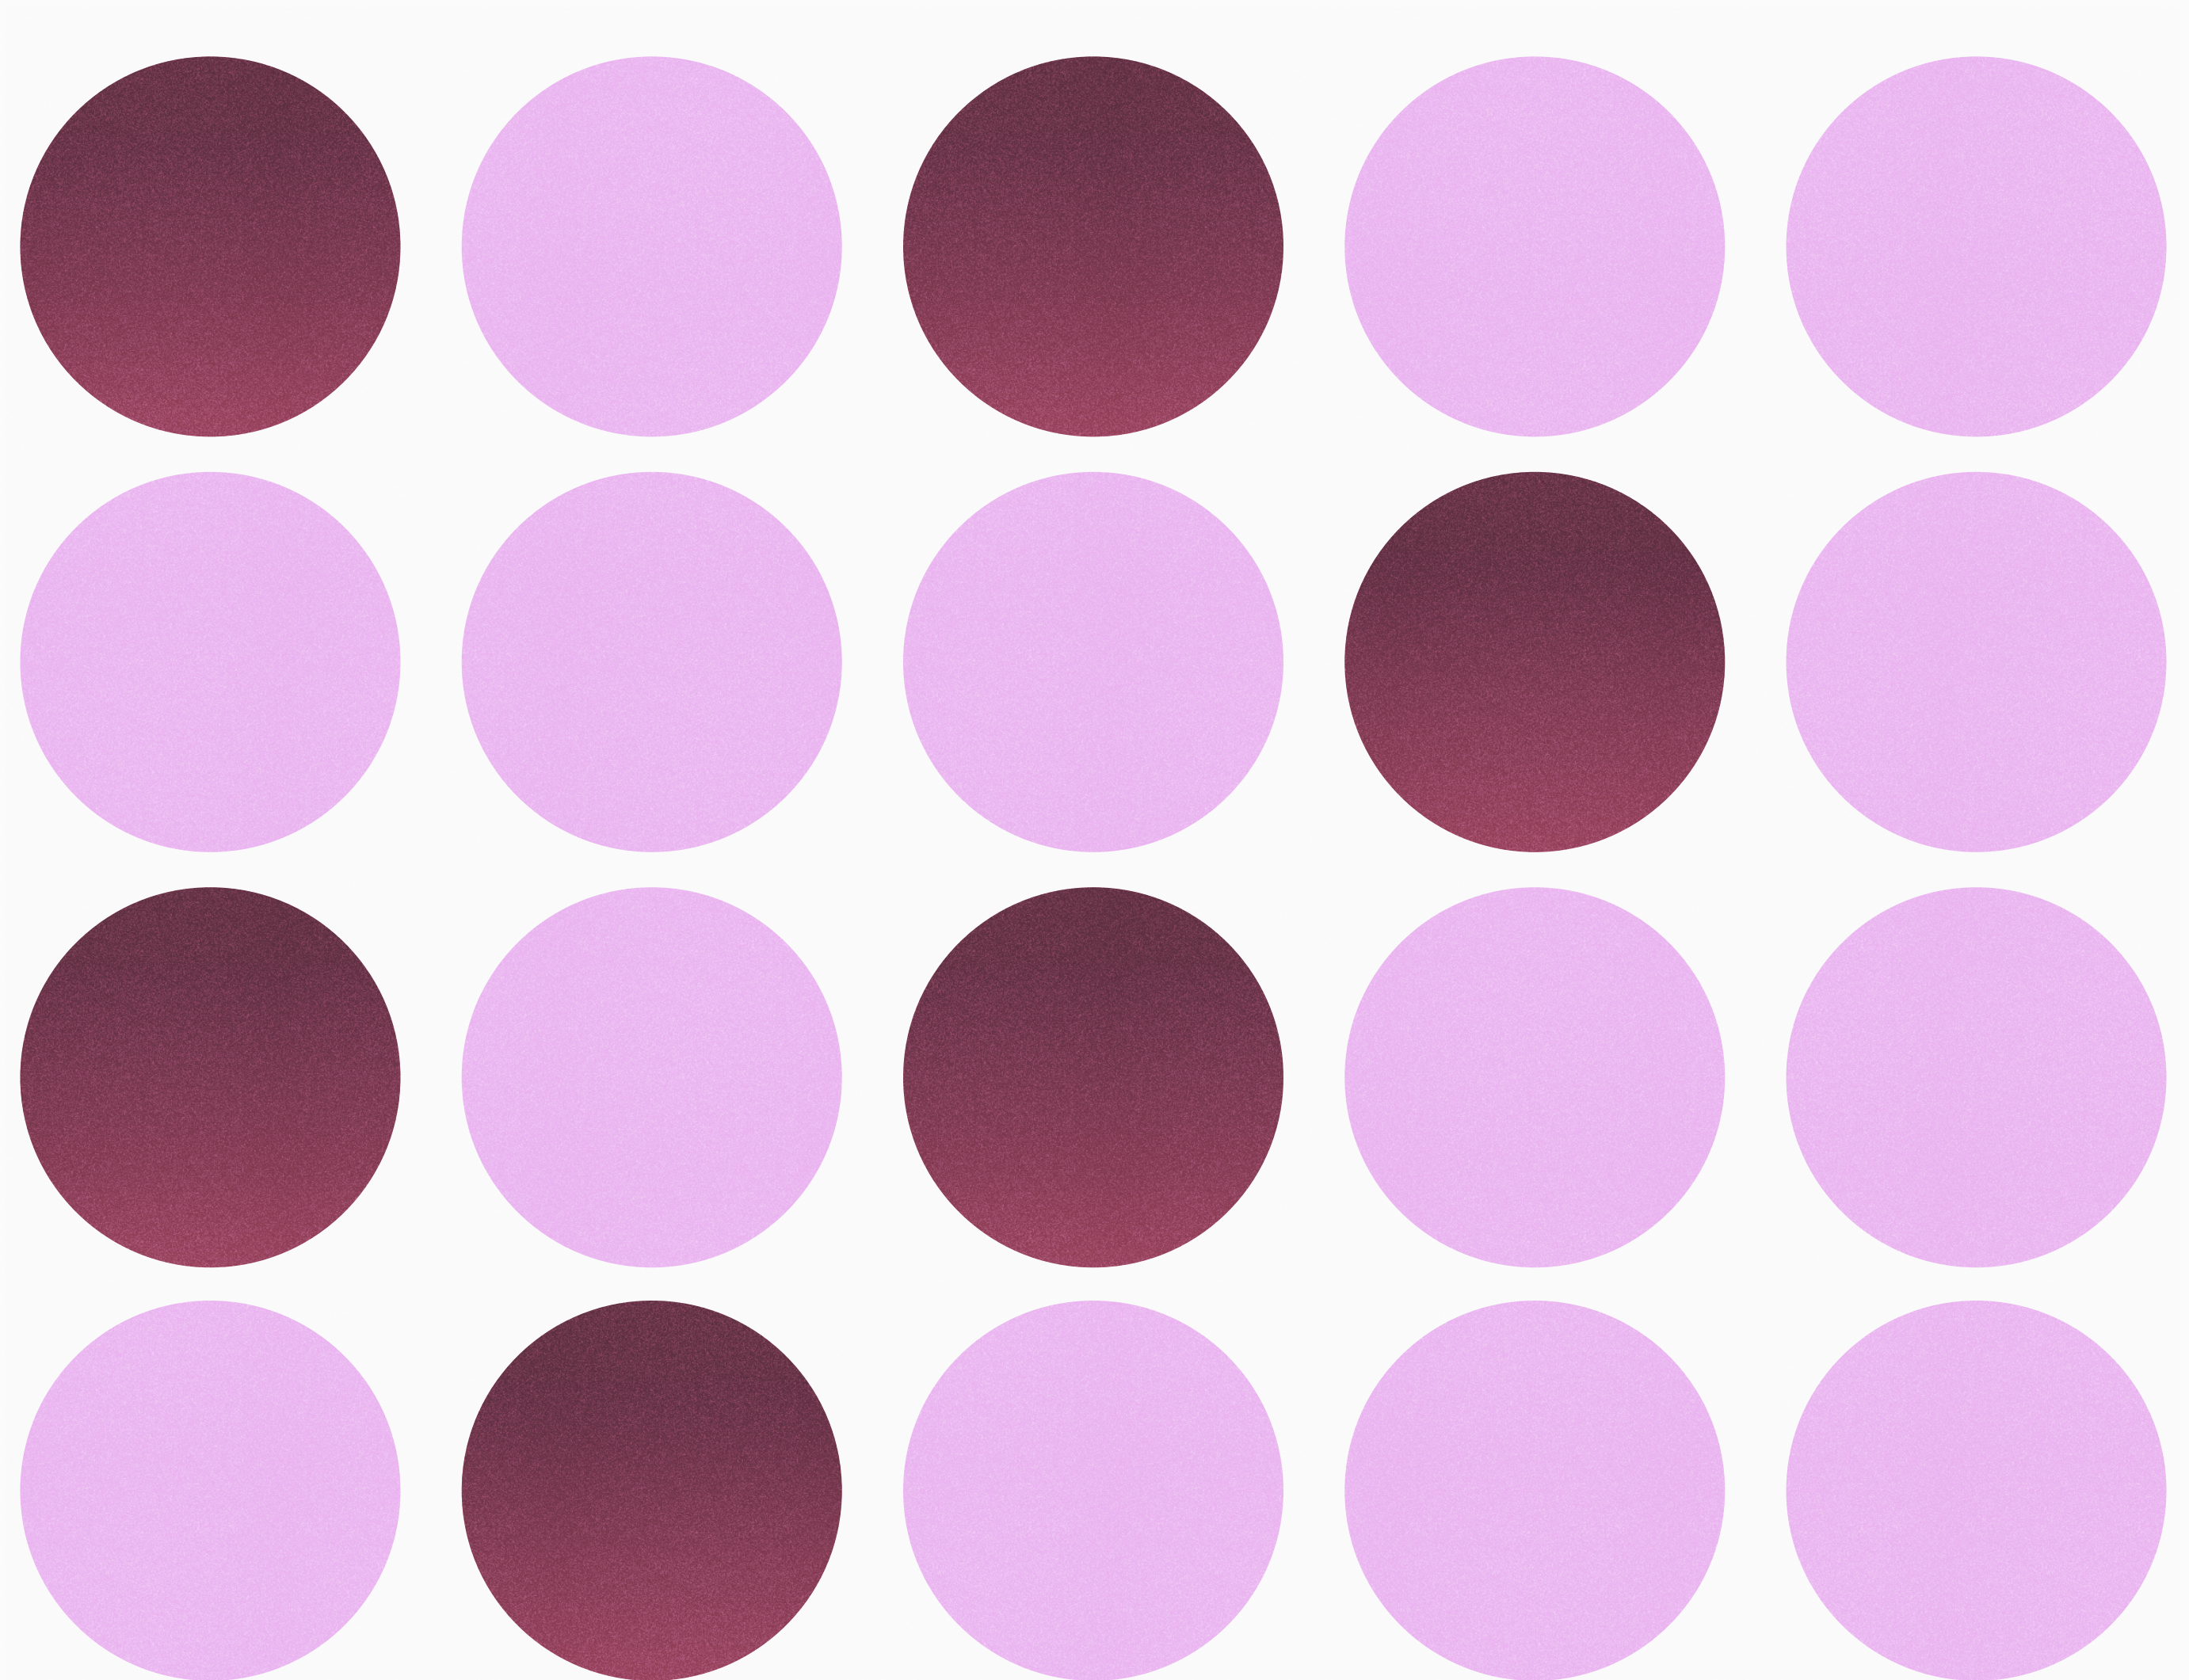

3 Examples

NN/G

Principle 1

Similarity

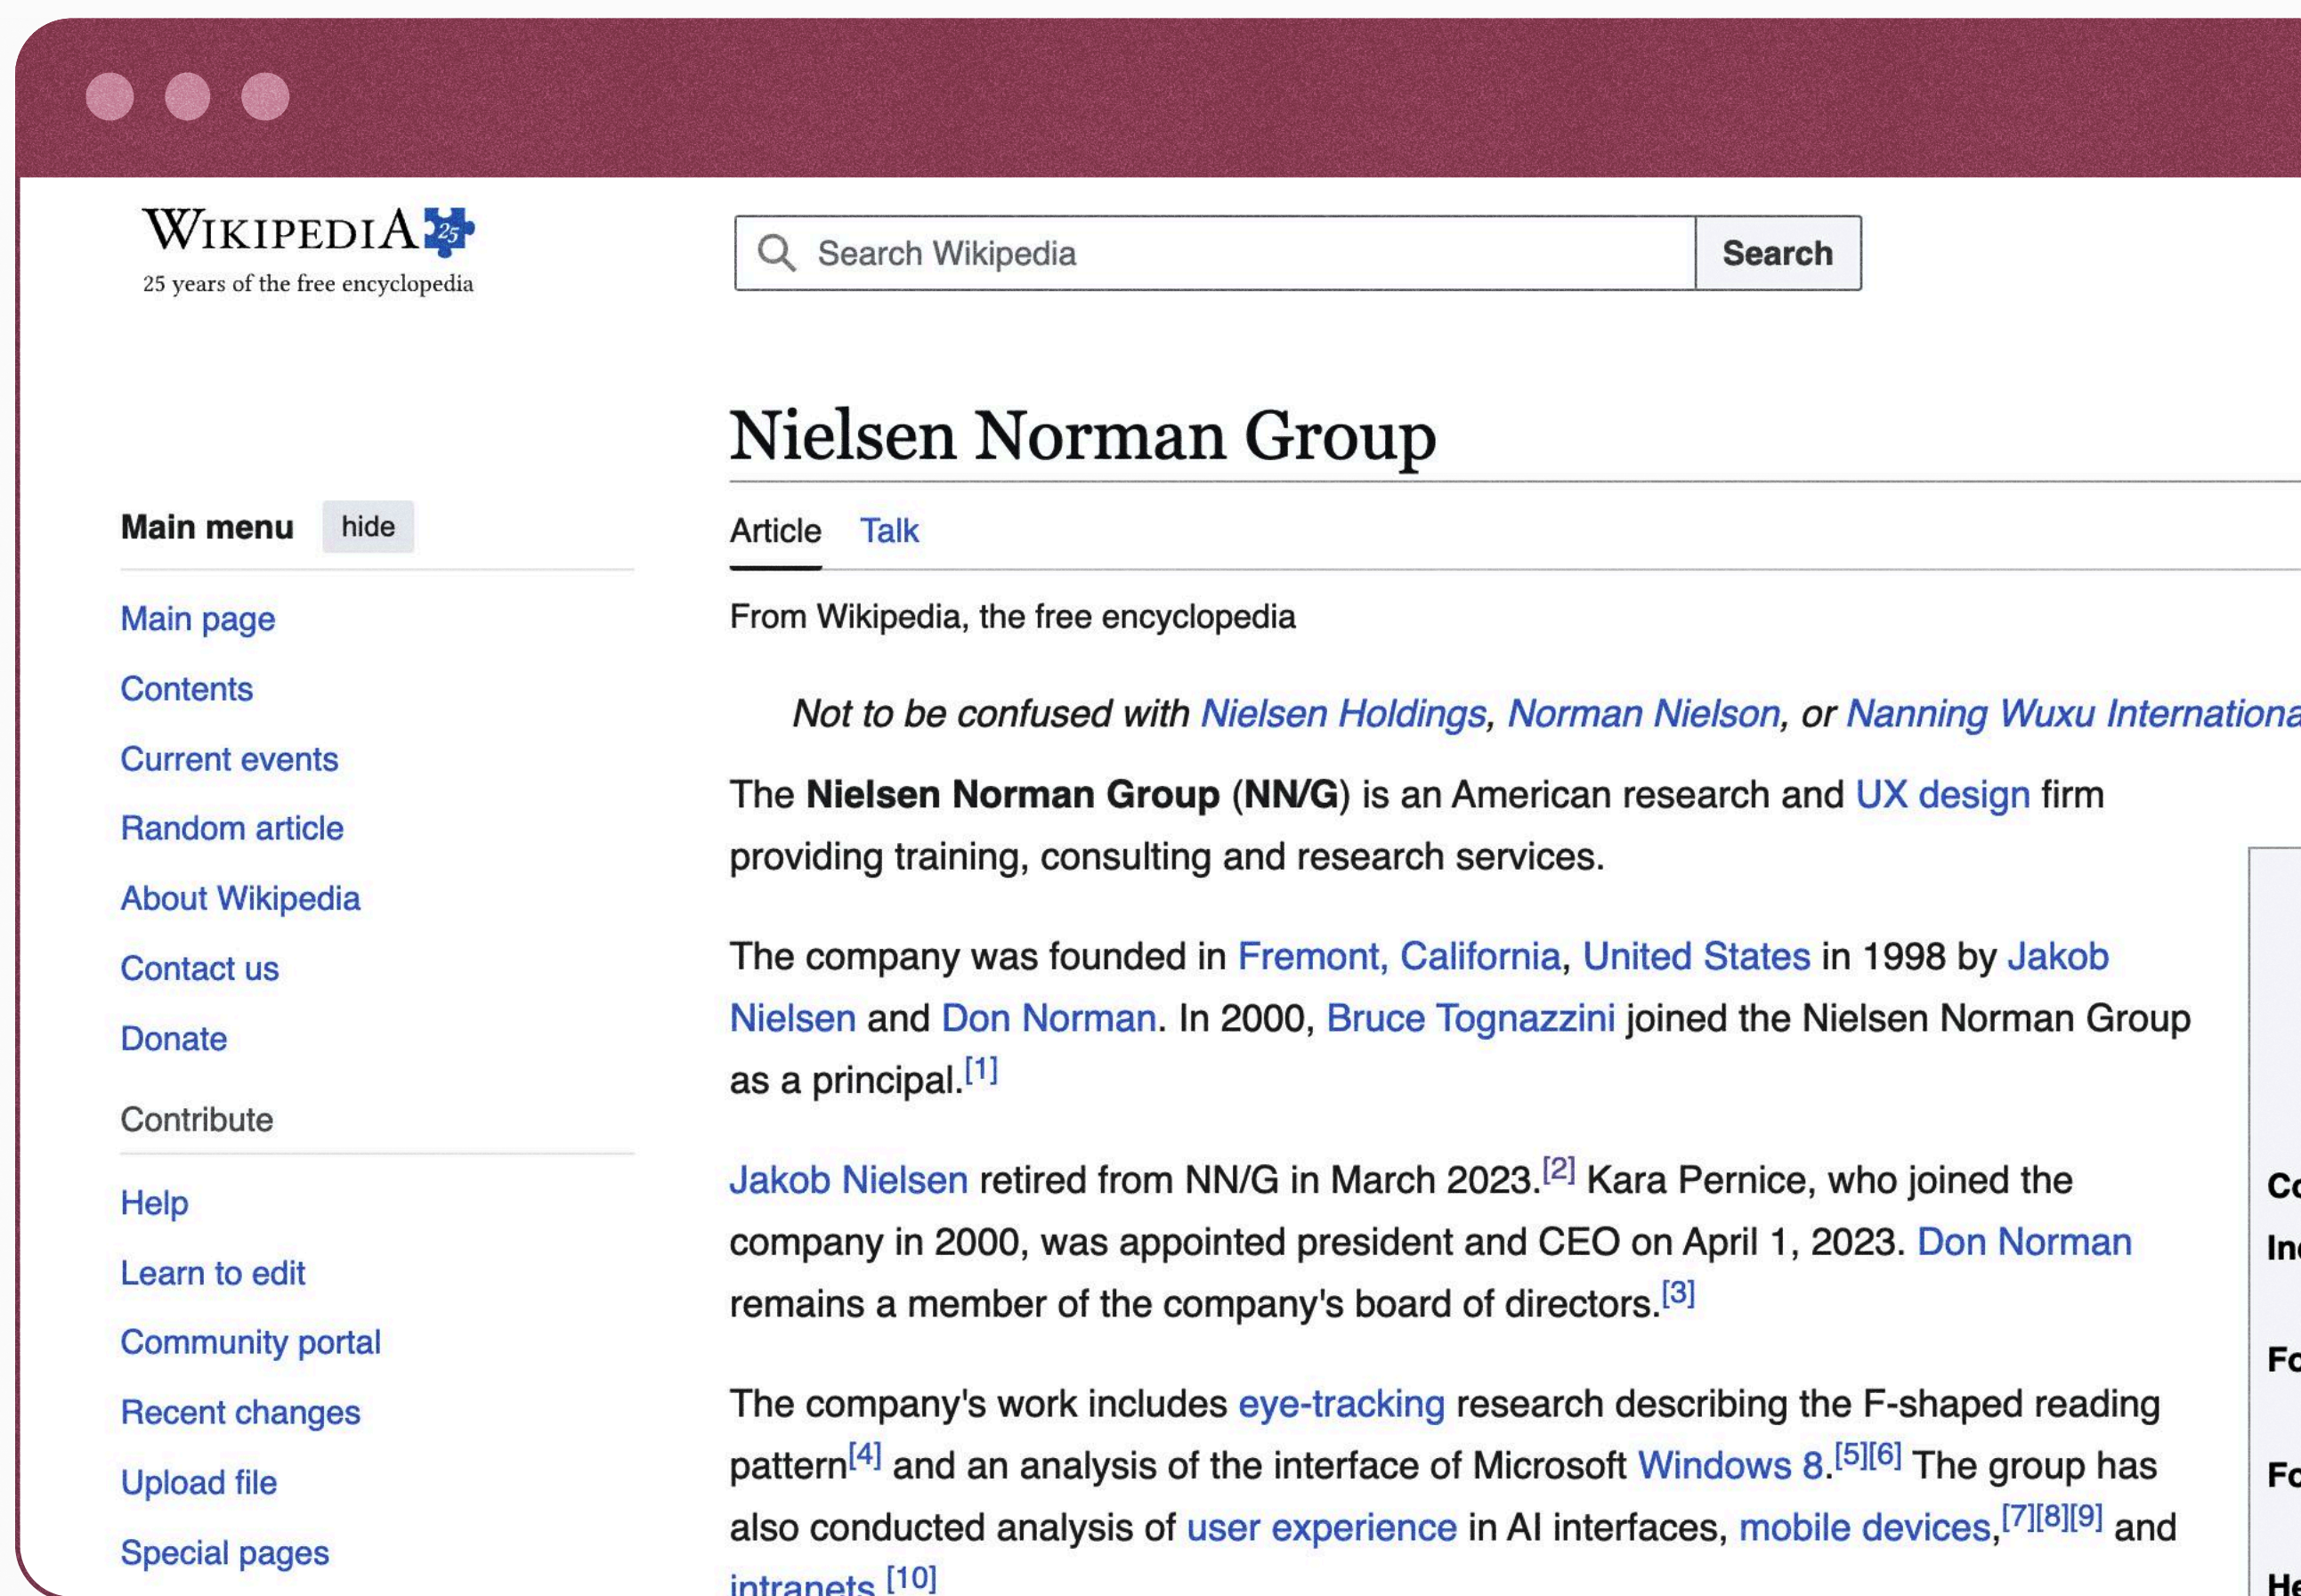

Humans perceive objects that share visual attributes as part of the same group.

Principle 1

Similarity in Action

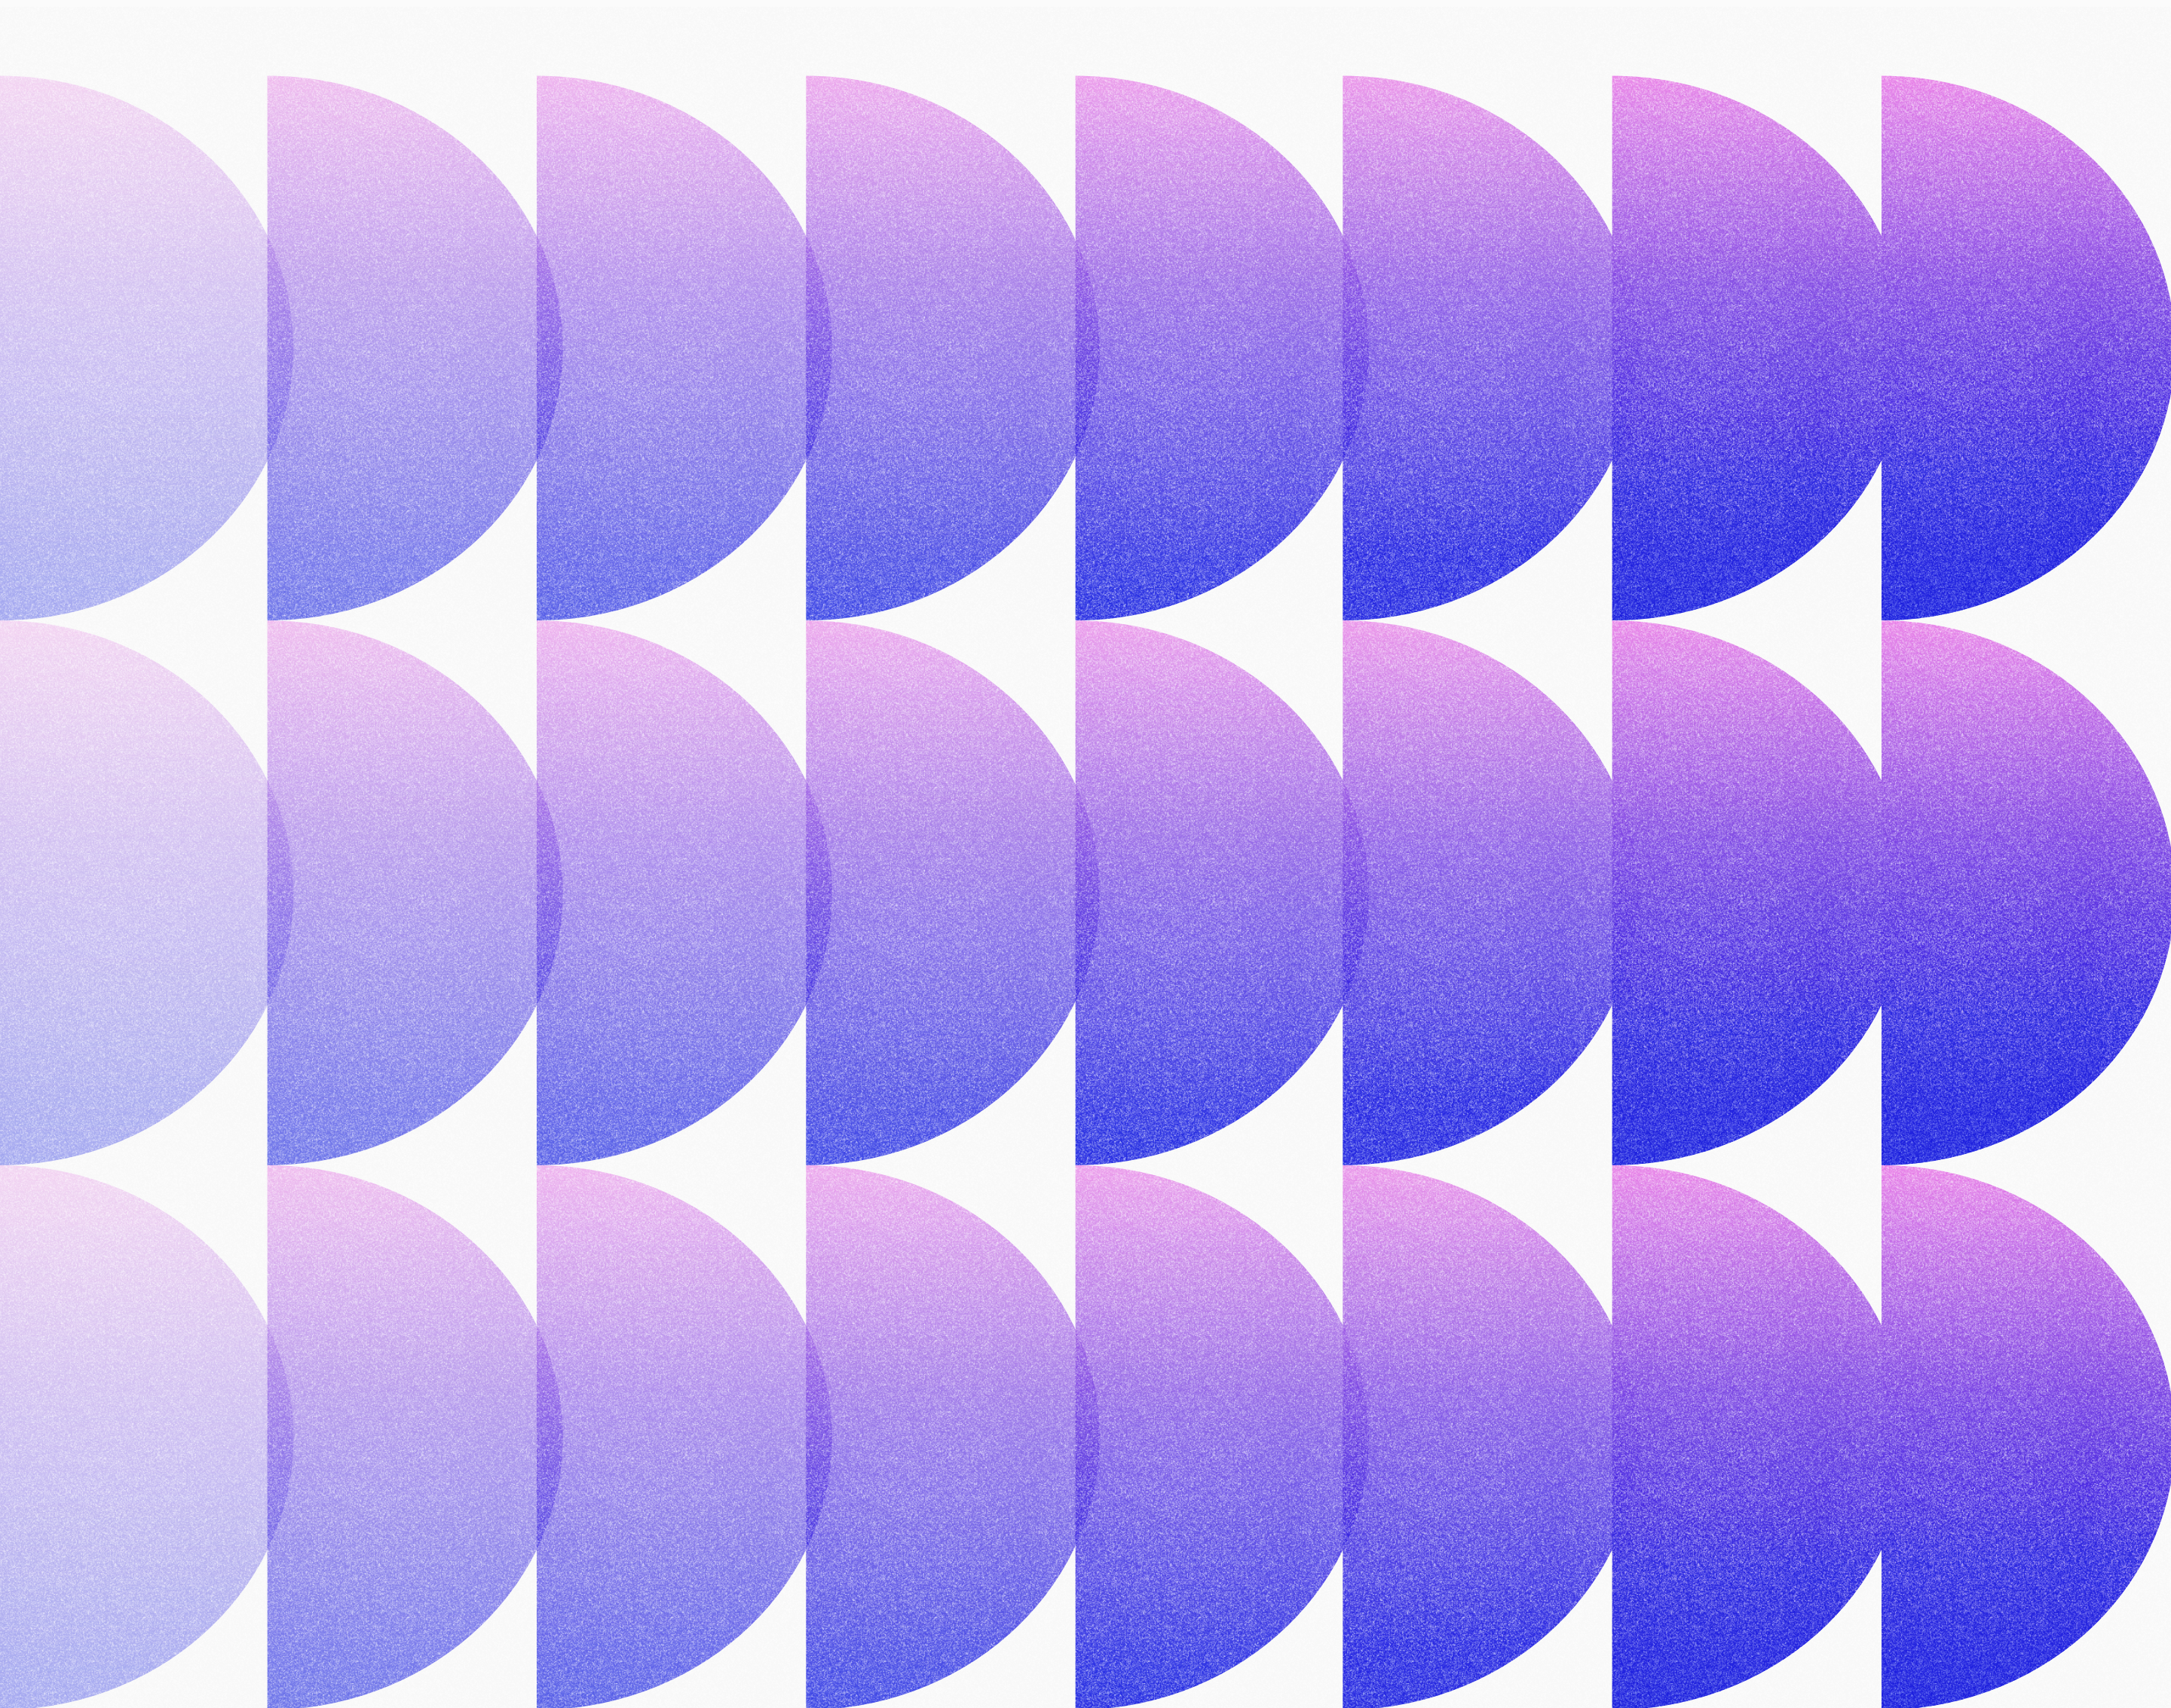

Designers indicate **hyperlinks** using a consistent color and underlining style, so users instantly recognize them as clickable.

Principle 2

Synchrony

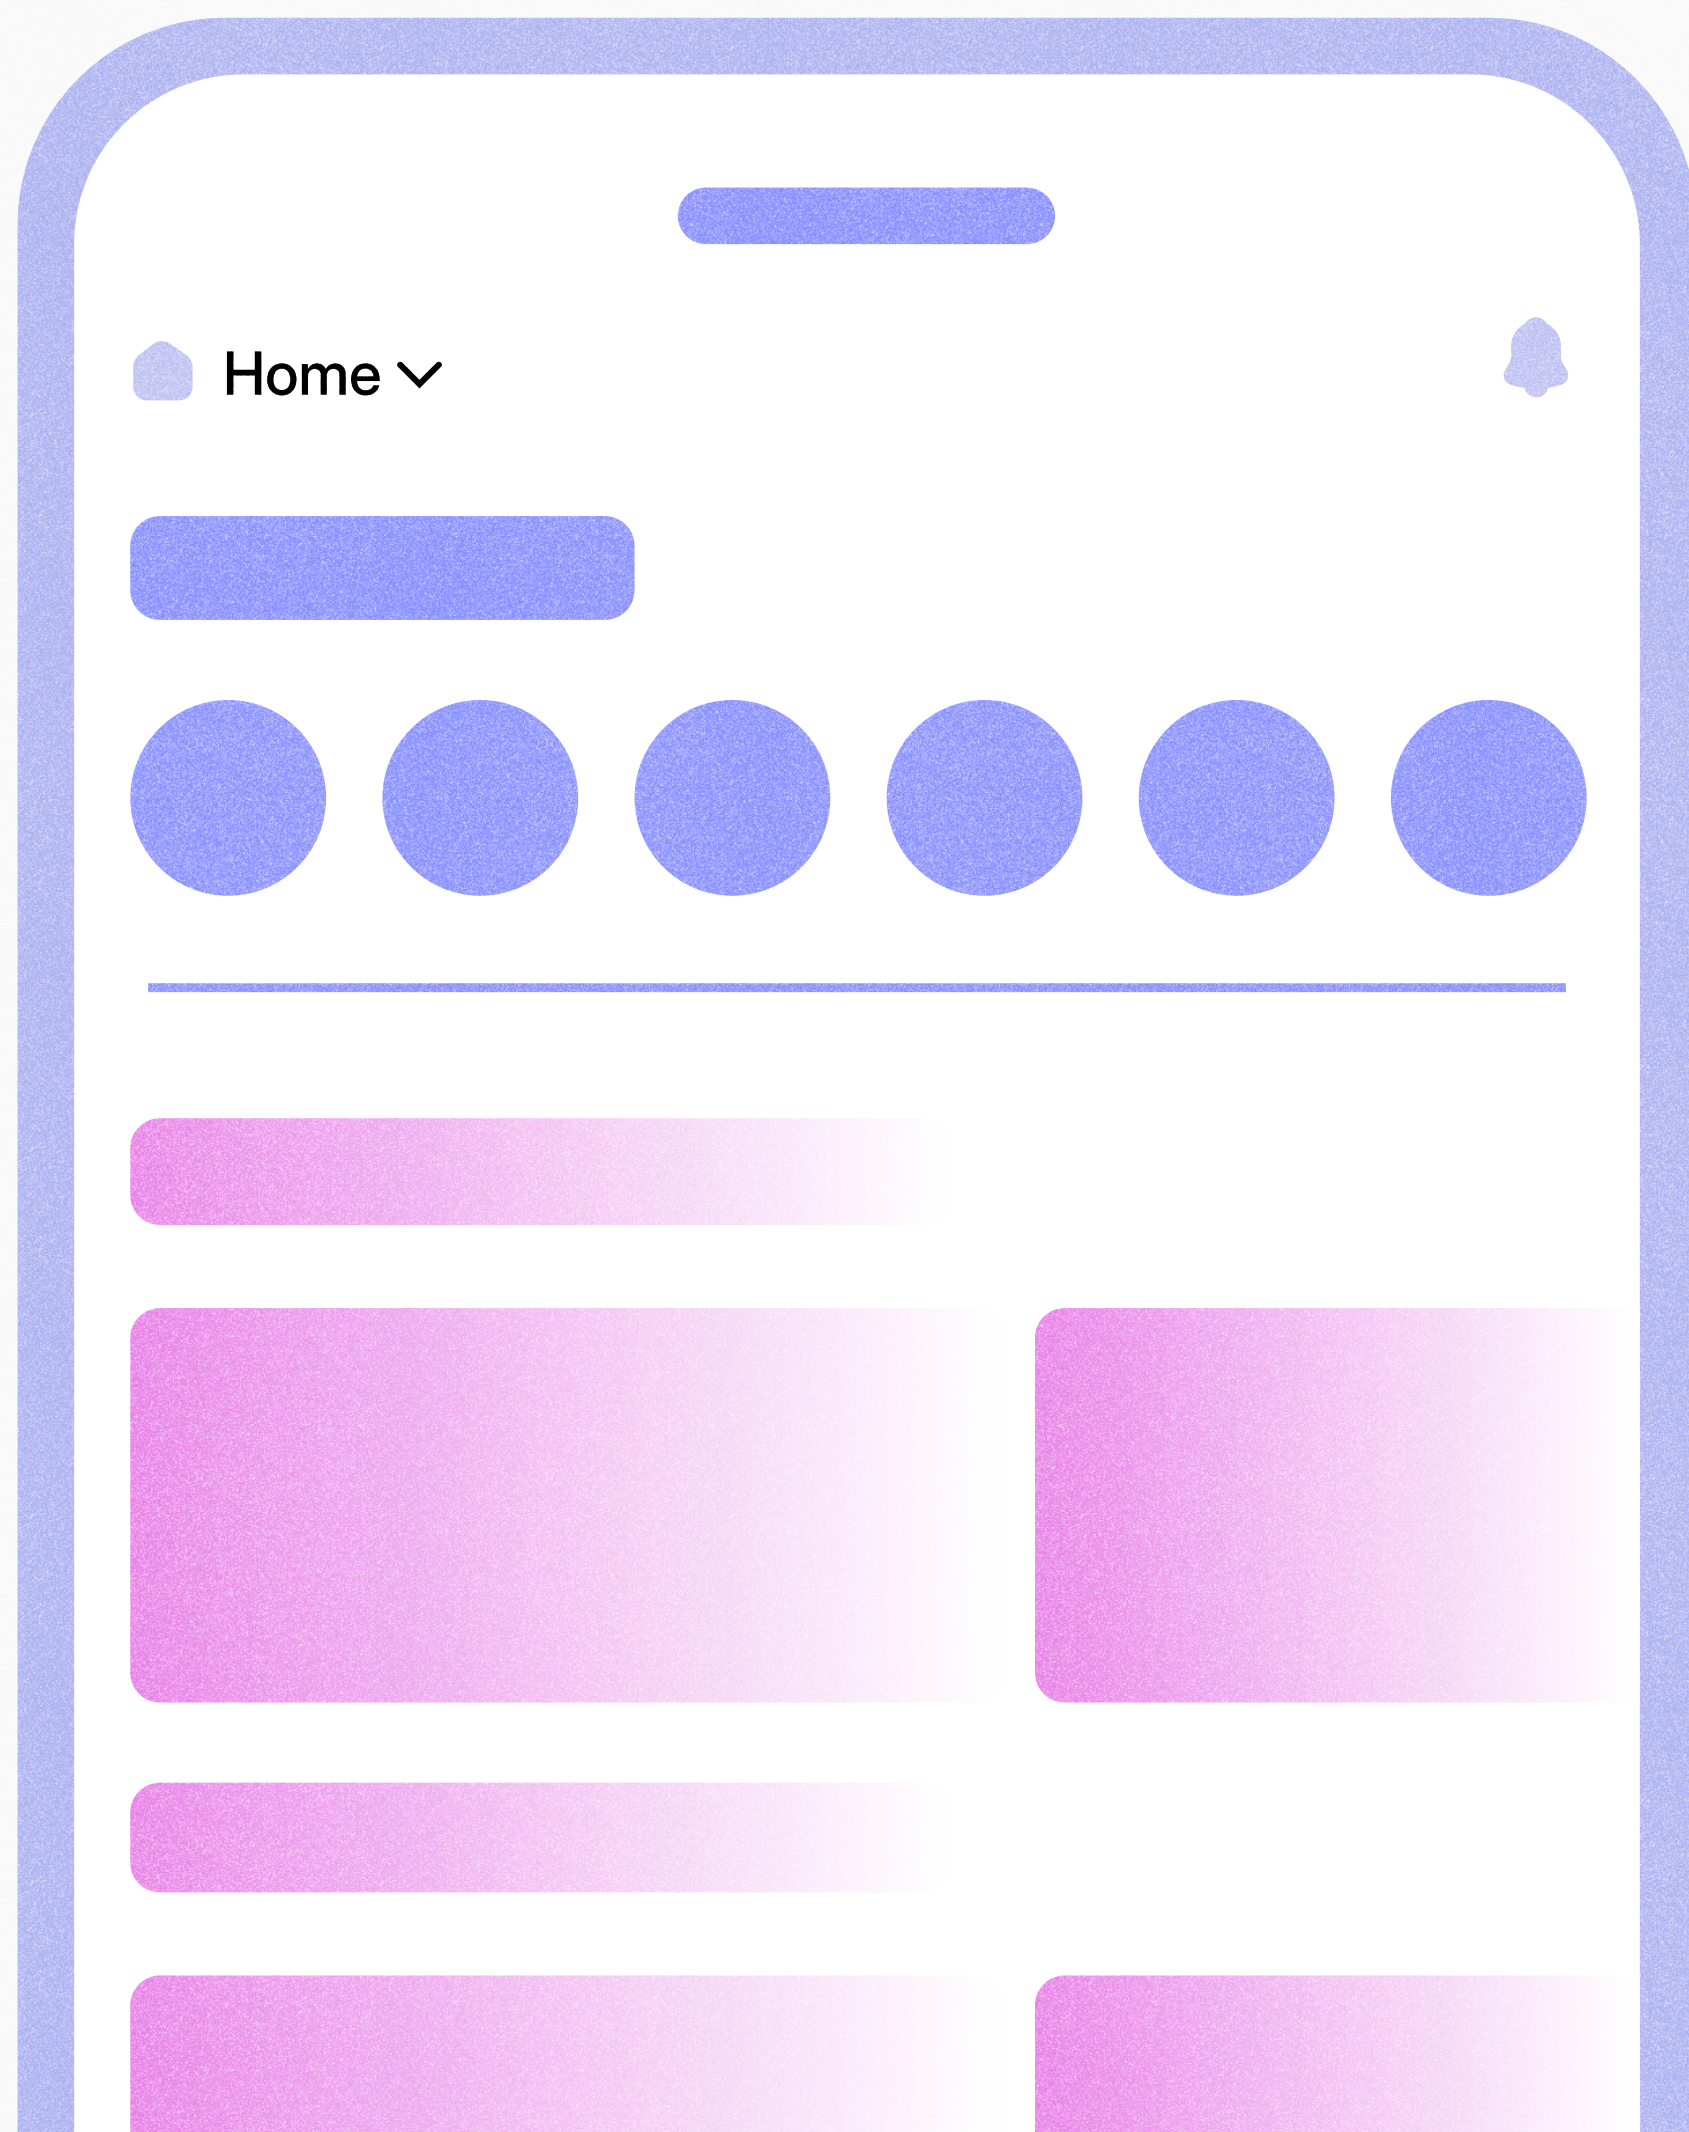

Objects that change at the same time are perceived as a group.

Principle 2

Synchrony In Action

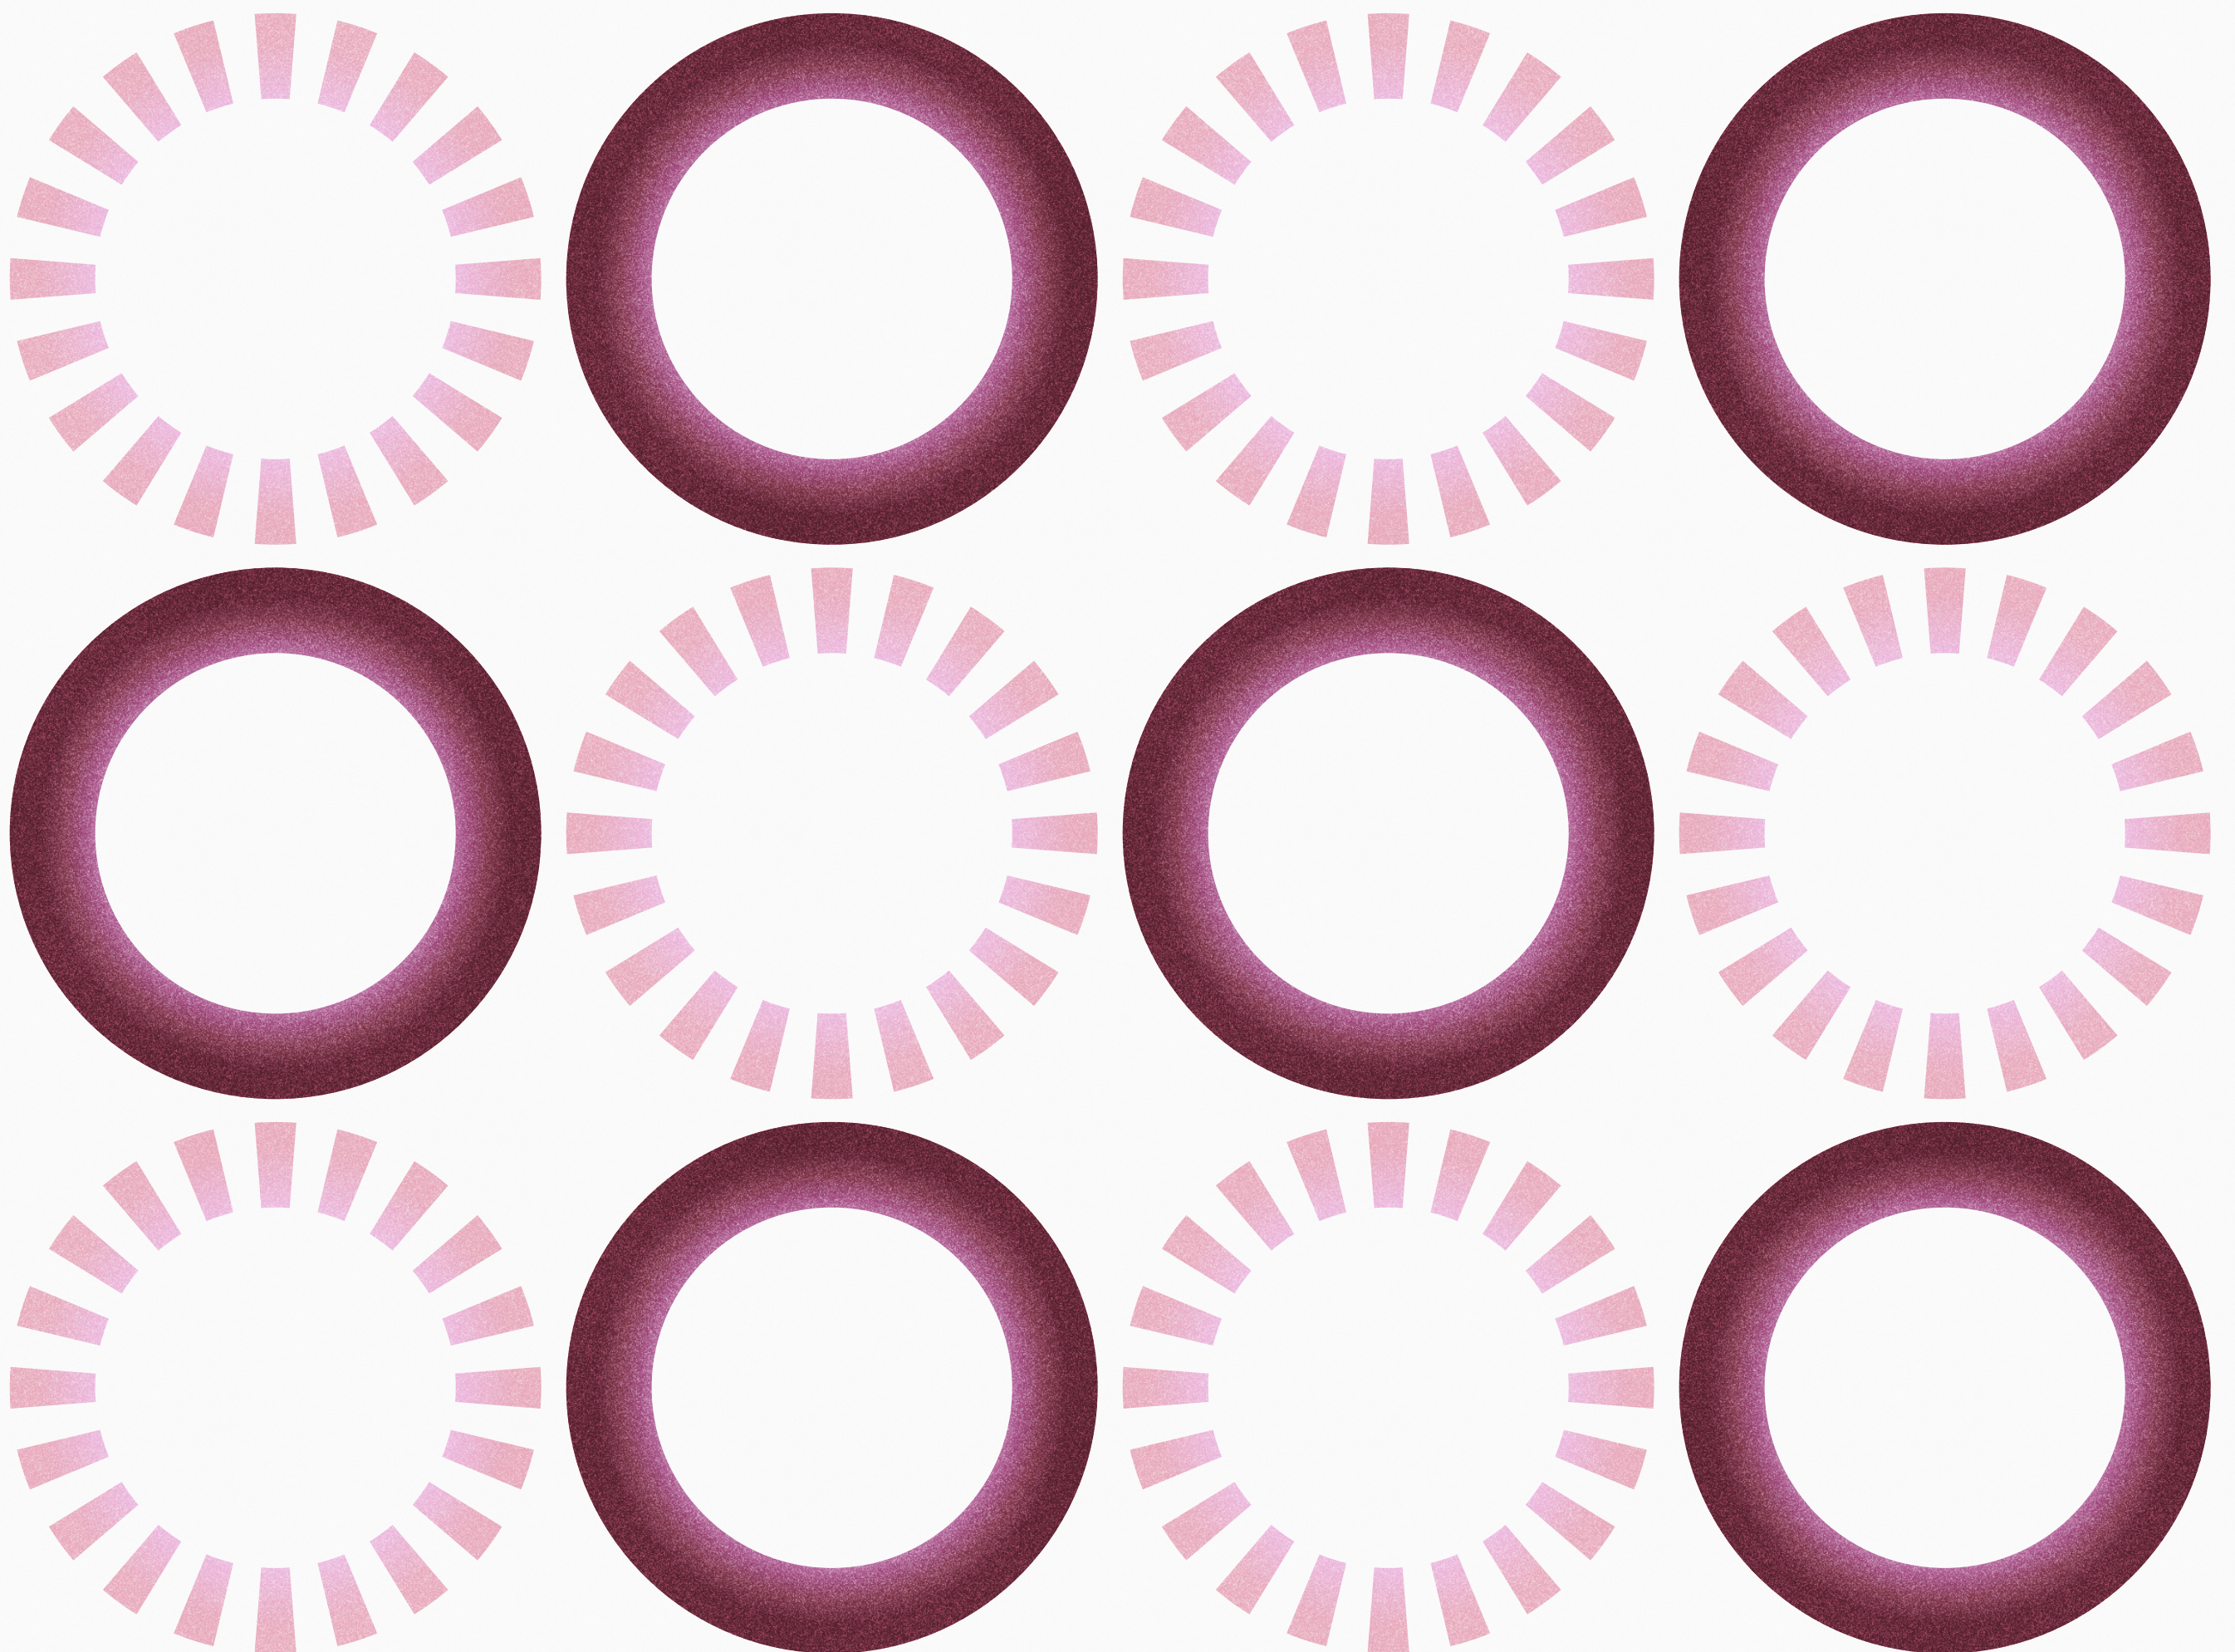

When a page loads, the placeholders pulse together, indicating a **single unified layout**.

Principle 3

Closure

Humans tend to perceive incomplete shapes as complete by filling in missing information.

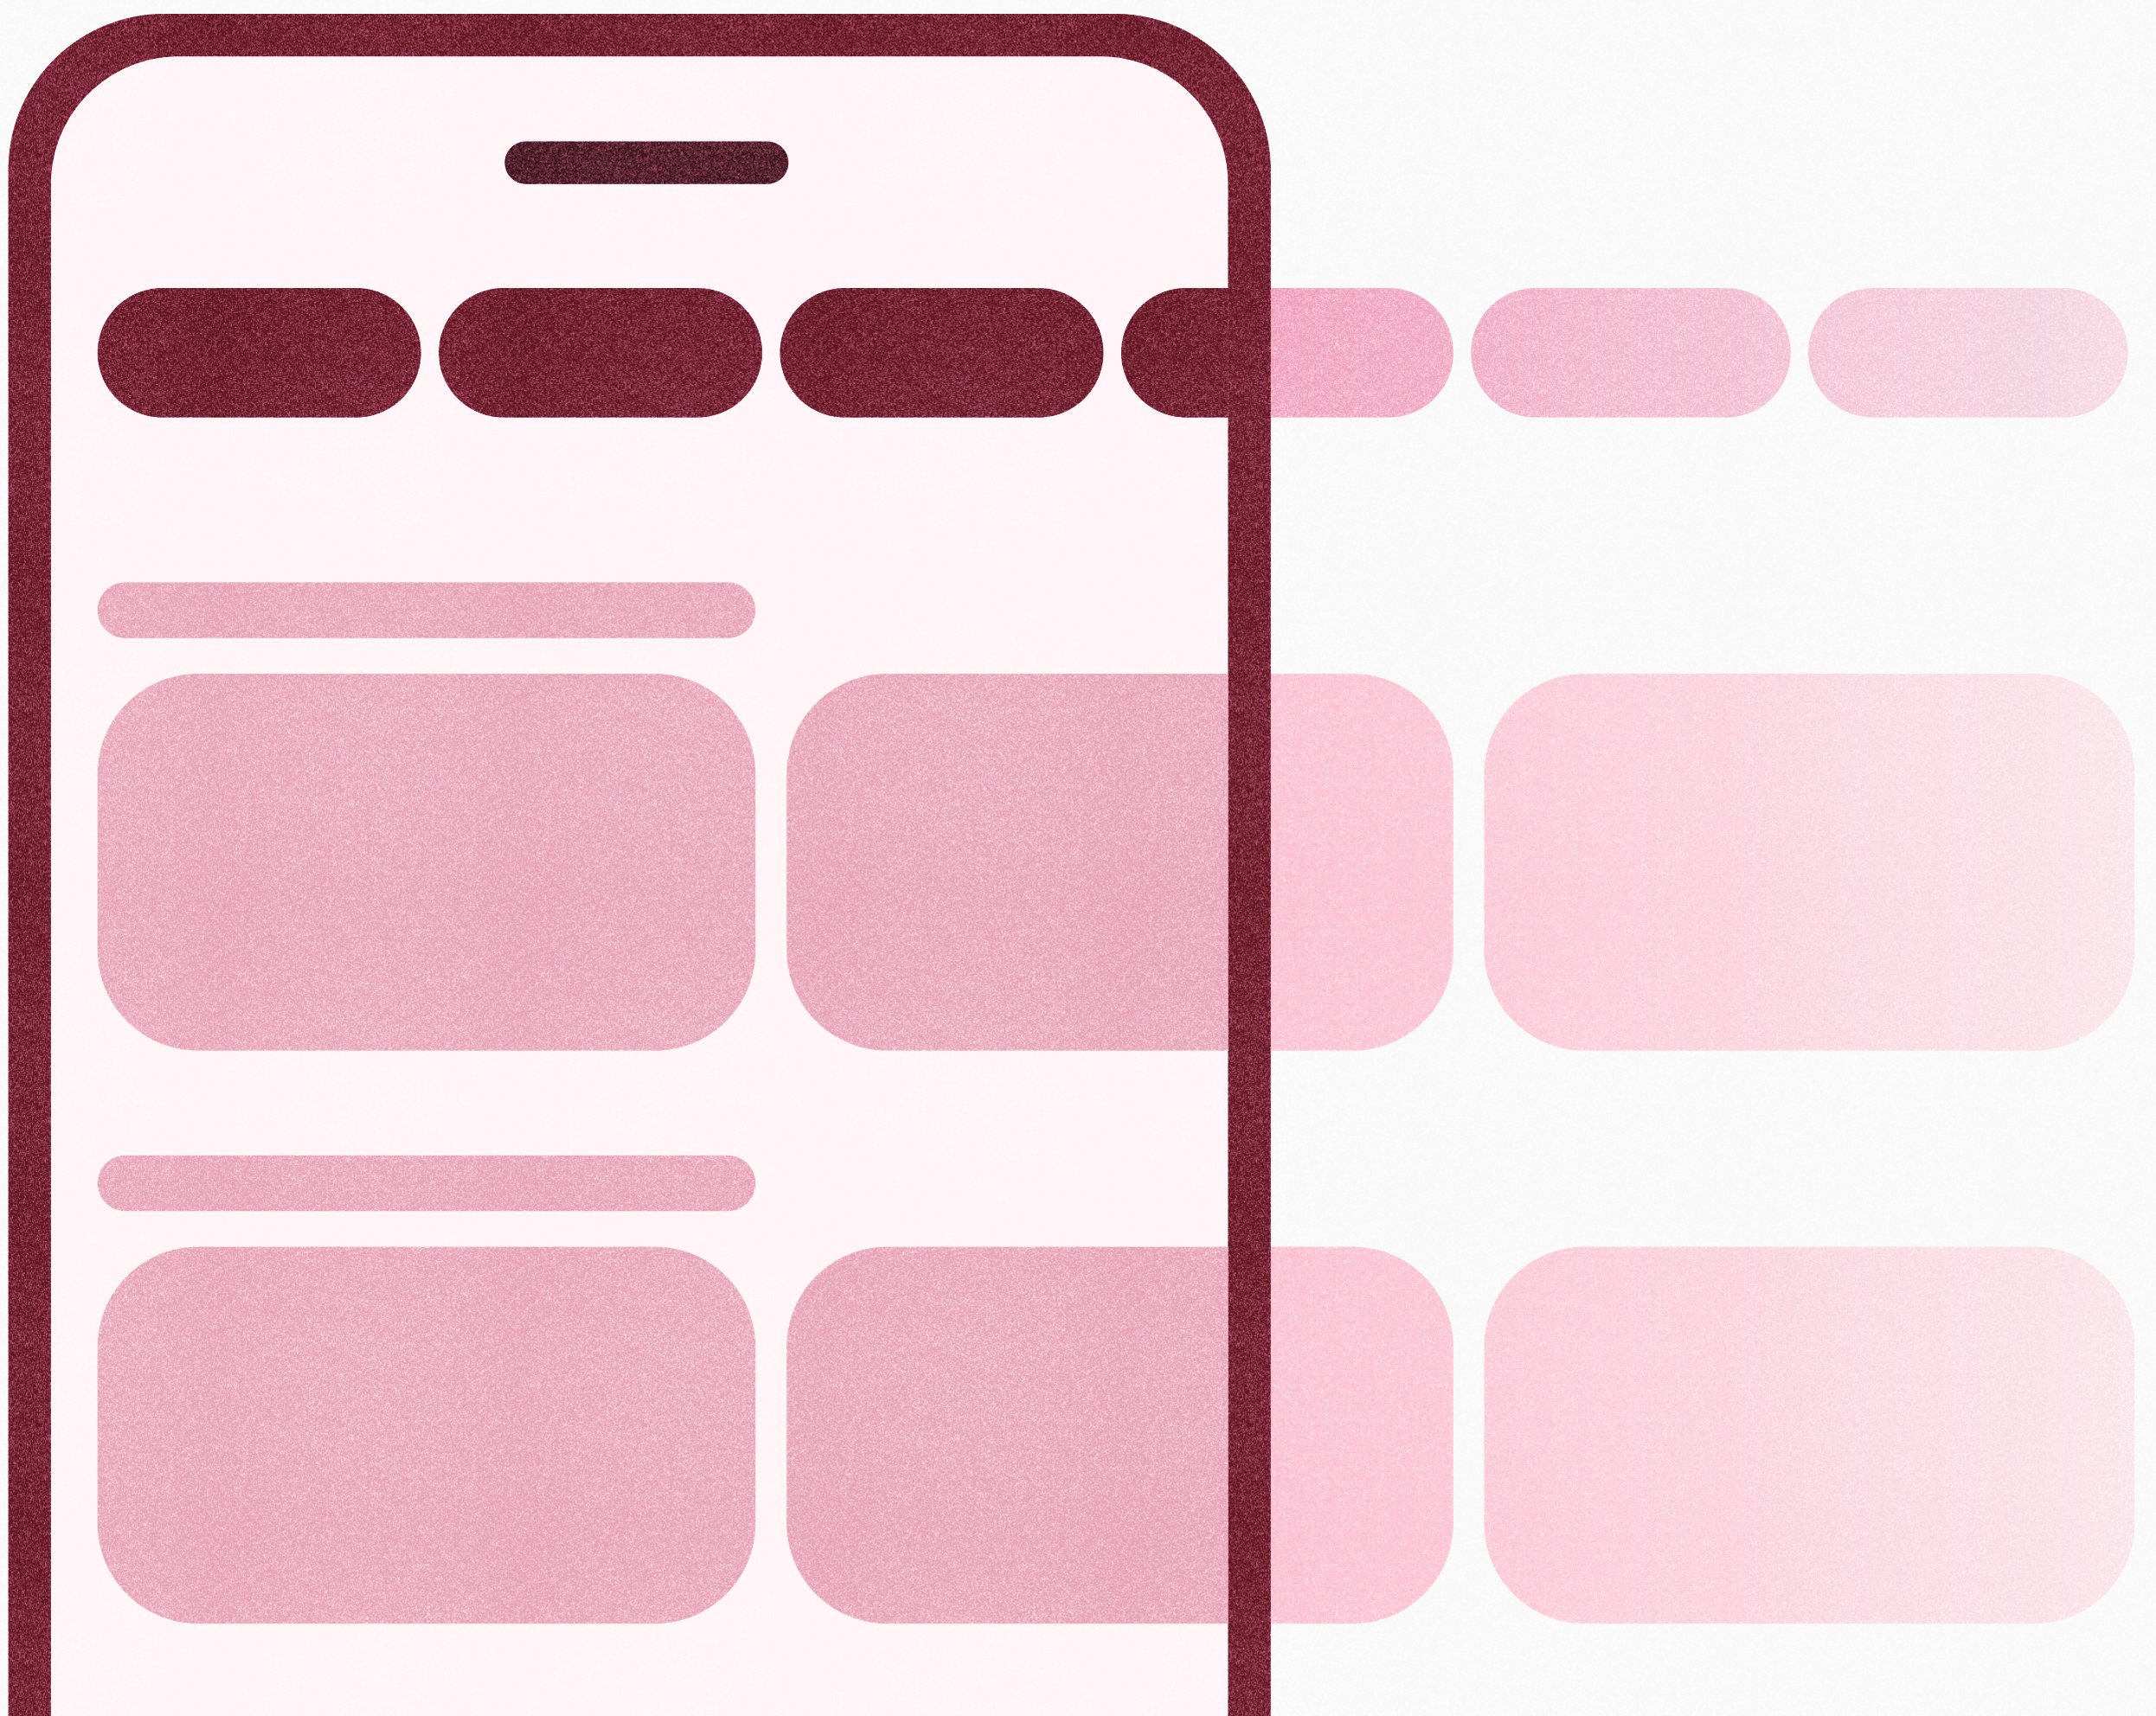

Principle 3

Closure In Action

Closure

Humans tend to perceive incomplete shapes as complete by filling in missing information.

Learn to apply Gestalt principles in your designs.
